Character strings to demonstrate some of the Advanced Typography plugin's features

Select the characters in the list below and choose **Tools** → **Typography** → **Enhance**.

Not really an arrow glyph: ->

"Double tear-drop quotation marks and apostrophes aren't typographically elegant."

But they should be honored in a `code-fragment: "true"`.

Try out AI Assistant!

Below are just a few of the ways you can use AI Assistant within your app. Since you can define your own custom prompts, the sky really is the limit!

 **Changing tone** – Lighten up the sentence below by selecting the text, clicking , and choosing *Change tone > Friendly*.

The 3Q23 financial results followed a predictable trend, reflecting the status quo from previous years.

 **Summarizing** – Below is a long paragraph that people may not want to read from start to finish. Get a quick summary by selecting the text, clicking , and choosing *Summarize content*.

Population growth in the 17th century was marked by significant increment in the number of people around the world. Various factors contributed to this demographic trend. Firstly, advancements in agriculture and technology resulted in increased food production and improved living conditions. This led to decreased mortality rates and better overall health, allowing for more individuals to survive and thrive. Additionally, the exploration and expansion of European powers, such as colonization efforts, fostered migration and settlement in new territories.

 **Writing from scratch** – Ask AI Assistant to generate content from scratch by clicking , and typing *Write a marketing email announcing TinyMCE's new AI Assistant plugin*.

Note on the included Templates demonstration

The included Templates demonstration uses the `advtemplate_list` configuration option to return a local promise containing a basic Template structure with self-contained examples.

This example allows for the loading of and interacting with the Template user-interface but cannot be used to create, edit, or save Template items.

See the [Templates](#) documentation for details on how to setup Templates to interact with external data sources.

Found a bug?

If you think you have found a bug please create an issue on the [GitHub repo](#) to report it to the developers.

Finally...

Don't forget to check out our other product [Plupload](#), your ultimate upload solution featuring HTML5 upload support.

Thanks for supporting TinyMCE! We hope it helps you and your users create great content.

All the best from the TinyMCE team.
